## NOTICE OF PRODUCT OBSOLESCENCE

VARTA Storage hereby announces expected discontinuance of the following product(s):

Discontinued Battery	Battery Description	Last Order	Last Delivery
56427 201 020	1/LPP 503759 8HH PCM W	21 <sup>st</sup> September 2019	31 <sup>st</sup> December 2019

### REMARKS

This battery has reached end of life under the existing specification due to end of life of the polymer cell.

A redesign of this product will commence, but the new product will be based on the new version LPP 503759 SGE cell (datasheet included) which will mean some changes between the old and new versions, the most notable of which will be:

Max charge voltage will change from 4.2V to 4.4V  
Nominal voltage will change from 3.7V to 3.85V  
Minimum capacity will increase from 1320mAh to 1830mAh  
The mechanical length will increase by approximately 1mm  
Due to feedback from the market, we plan to add a connector to the new model

The new version product drawing will be available by end of January 2020 for review and future orders. Initial lead time is expected to be 40 weeks.

For this reason, please take care to order enough batteries to secure supply from VARTA of the existing battery for this change. We recommend customers/distributors to cover demands until the end of 2020.
