Part No. E2017AAO0A0R

## FCC Statement

THIS DEVICE COMPLIES WITH PART 15 FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

- (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE.
- (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRE OPERATION.

THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS "A" DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES.

THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND, IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS.

OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT HIS OWN EXPENSE.

## A Message to the Customer

### *Avalue Customer Services*

Each and every Avalue's product is built to the most exacting specifications to ensure reliable performance in the harsh and demanding conditions typical of industrial environments. Whether your new Avalue device is destined for the laboratory or the factory floor, you can be assured that your product will provide the reliability and ease of operation for which the name Avalue has come to be known.

Your satisfaction is our primary concern. Here is a guide to Avalue's customer services. To ensure you get the full benefit of our services, please follow the instructions below carefully.

### *Technical Support*

We want you to get the maximum performance from your products. So if you run into technical difficulties, we are here to help. For the most frequently asked questions, you can easily find answers in your product documentation. These answers are normally a lot more detailed than the ones we can give over the phone. So please consult the user's manual first.

To receive the latest version of the user's manual; please visit our Web site at:

4.6	Install Ethernet Driver .....	95

# 1. Getting Started

## 1.1 Safety Precautions

### Warning!

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronics personnel should open the PC chassis.

### Caution!

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

## 1.2 Packing List

- 1 x EMS-TGL 11th Gen Intel®Core™ Processor i7/i5/i3 Fanless Rugged Embedded System
- 1 x Terminal block to lockable DC Jack cable
- 1 x DP to VGA Converter
- 1 x Screw driver for chassis
- 1 x Wire tie for HDMI
- 1 x 60W adapter (optional)
- 1 x Power cord (optional)
- 1 x Thermal pad for M.2 NVMe SSD

If any of the above items is damaged or missing, contact your retailer.

## 1.3 System Specifications

## 2.12 Installing Hard Disk & Memory (EMS-TGL)

**Step 1.** Remove 8 screws from the bottom of your system and take it off.

**Step 2.** Slide the DDR4 SODIMM into the memory socket and press it down until properly seated.

**Step 3.** Insert M.2 M-Key card into designated locations, between M.2 and thermal solution please paste with thermal pad, and fasten with screws to complete installation.

## 3.BIOS Setup

---

Texim Europe

### 3.1 Introduction

The BIOS setup program allows users to modify the basic system configuration. In this following chapter will describe how to access the BIOS setup program and the configuration options that may be changed.

### 3.2 Starting Setup

The AMI BIOS™ is immediately activated when you first power on the computer. The BIOS reads the system information contained in the NVRAM and begins the process of checking out the system and configuring it. When it finishes, the BIOS will seek an operating system on one of the disks and then launch and turn control over to the operating system.

While the BIOS is in control, the Setup program can be activated in one of two ways:

By pressing <Del> or <F2> immediately after switching the system on, or

By pressing the <Del> or <F2> key when the following message appears briefly at the left-top of the screen during the POST (Power On Self Test).

**Press <Del> or <F2> to enter SETUP**

If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys. If you do not press the keys at the correct time and the system does not boot, an error message will be displayed and you will again be asked to.

**Press F1 to Continue, DEL to enter SETUP**

### 3.3 Using Setup

In general, you use the arrow keys to highlight items, press <Enter> to select, use the PageUp and PageDown keys to change entries, press <F1> for help and press <Esc> to quit. The following table provides more detail about how to navigate in the Setup program using the keyboard.

Button	Description
↑	Move to previous item
↓	Move to next item
←	Move to the item in the left hand
→	Move to the item in the right hand
Esc key	Main Menu -- Quit and not save changes into NVRAM Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
+ key	Increase the numeric value or make changes
- key	Decrease the numeric value or make changes
F1 key	General help, only for Status Page Setup Menu and Option Page Setup Menu
F2 key	Previous Values.
F3 key	Optimized defaults
F4 key	Save & Exit Setup

- **Navigating Through The Menu Bar**

Use the left and right arrow keys to choose the menu you want to be in.

**Note:** Some of the navigation keys differ from one screen to another.

- **To Display a Sub Menu**

Use the arrow keys to move the cursor to the sub menu you want. Then press <Enter>. A “>” pointer marks all sub menus.

### 3.4 Getting Help

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc> or the F1 key again.

### 3.5 In Case of Problems

If, after making and saving system changes with Setup, you discover that your computer no longer is able to boot, the AMI BIOS supports an override to the NVRAM settings which resets your system to its defaults.

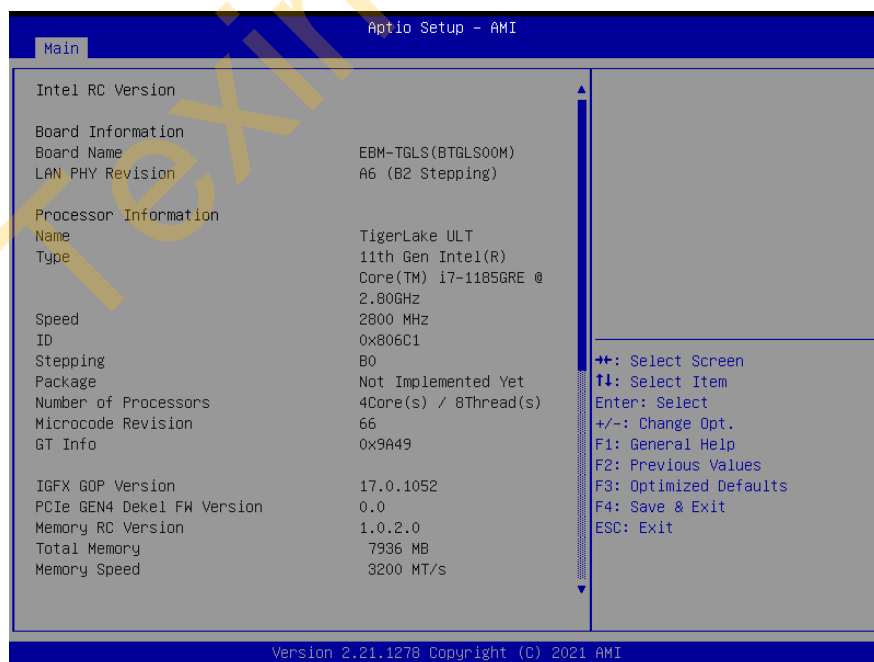

The best advice is to only alter settings which you thoroughly understand. To this end, we strongly recommend that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both BIOS Vendor and your systems manufacturer to provide the absolute maximum performance and reliability. Even a seemingly small change to the chipset setup has the potential for causing you to use the override.

### 3.6 BIOS setup

Once you enter the Aptio Setup Utility, the Main Menu will appear on the screen. The Main Menu allows you to select from several setup functions and exit choices. Use the arrow keys to select among the items and press <Enter> to accept and enter the sub-menu.

#### 3.6.1 Main Menu

This section allows you to record some basic hardware configurations in your computer and set the system clock.

### 3.6.1.1 System Language

This option allows choosing the system default language.

### 3.6.1.2 System Date

Use the system date option to set the system date. Manually enter the day, month and year.

### 3.6.1.3 System Time

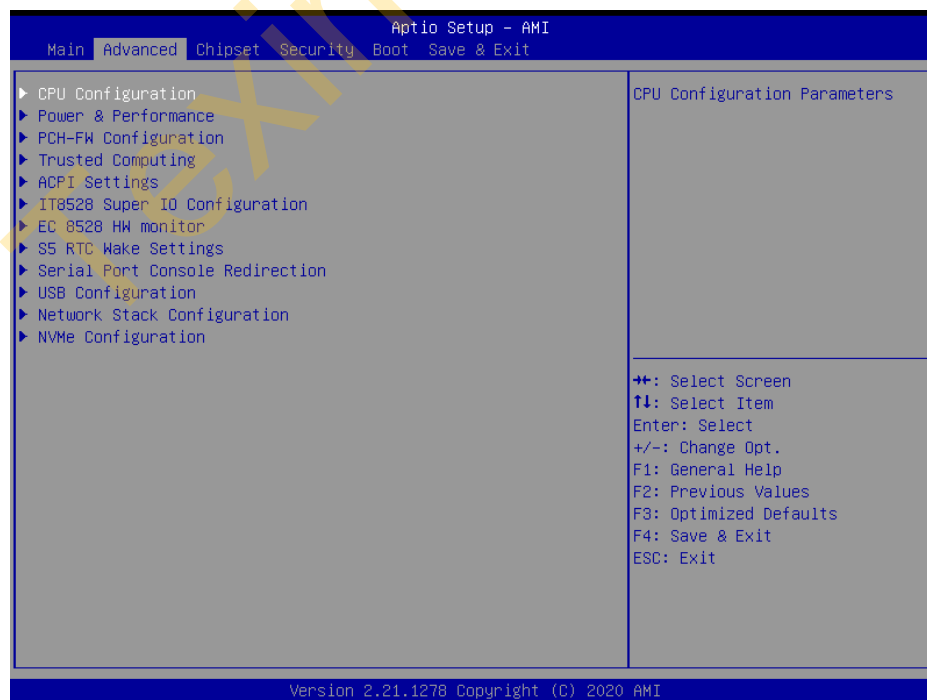

Use the system time option to set the system time. Manually enter the hours, minutes and seconds.

**Note:** The BIOS setup screens shown in this chapter are for reference purposes only, and may not exactly match what you see on your screen. Visit the Avalue website ([www.avalue.com.tw](http://www.avalue.com.tw)) to download the latest product and BIOS information.

## 3.6.2 Advanced Menu

This section allows you to configure your CPU and other system devices for basic operation through the following sub-menus.

### 3.6.2.1 CPU Configuration

Use the CPU configuration menu to view detailed CPU specification and configure the CPU.

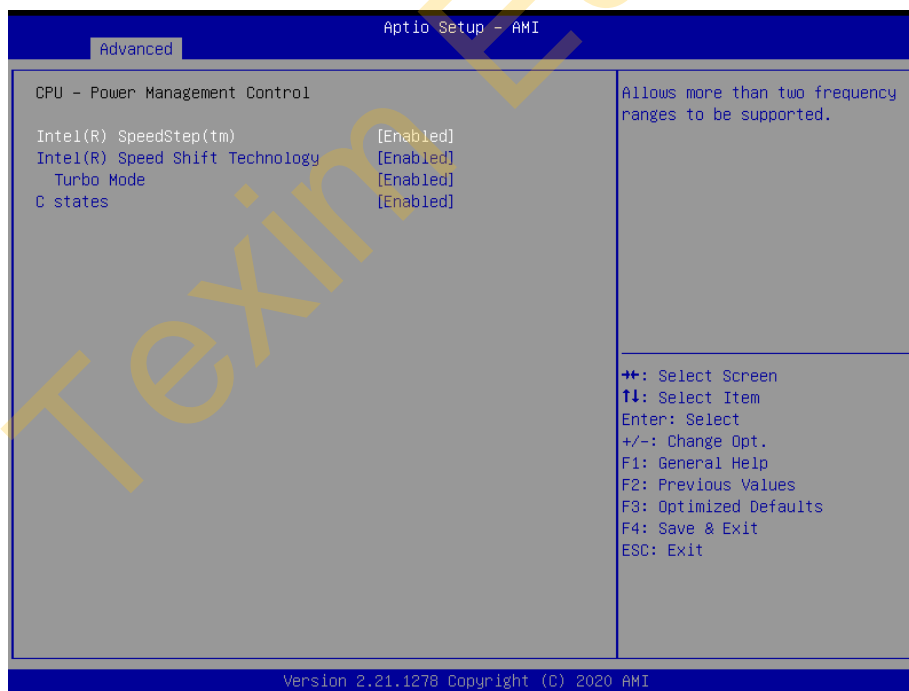

Item	Options	Description
<b>Intel(VMX) Virtualization Technology</b>	Disabled Enabled <b>[Default]</b>	When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.
<b>Active Processor Cores</b>	<b>All [Default]</b> 1 2 3	Number of cores to enable in each processor package.

### 3.6.2.2 Power & Performance

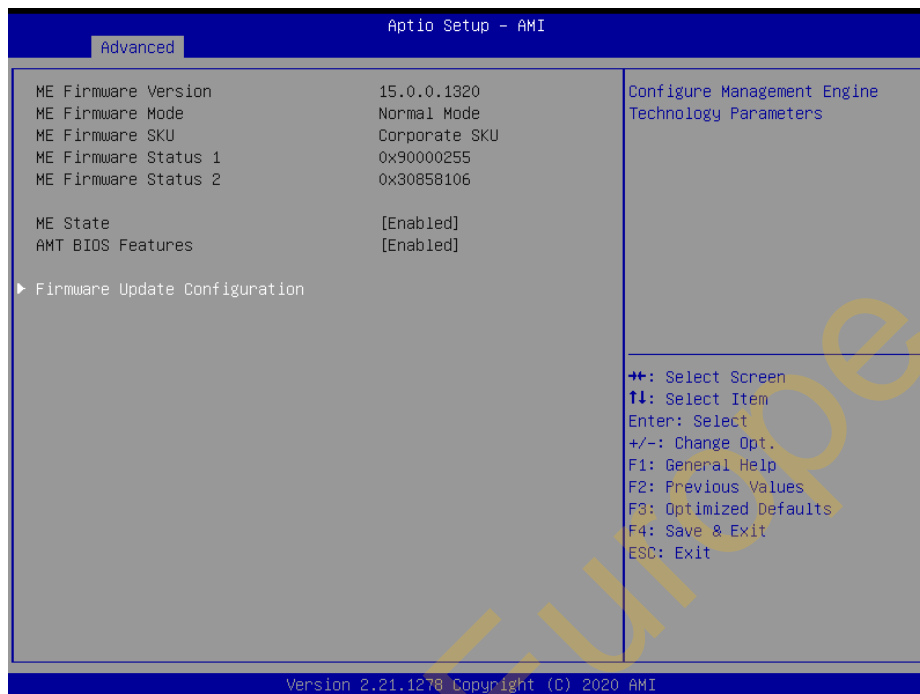

#### 3.6.2.2.1 CPU-Power Management Control

Item	Option	Description
Intel® SpeedSted™	Enabled[Default], Disabled	Allows more than two frequency ranges to be supported.
Intel® Speed Shift Technology	Enabled[Default], Disabled	Enable/Disable Intel® Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.

<b>Turbo Mode</b>	Enabled[Default], Disabled	Enable/Disable processor Turbo Mode (requires EMTTM enabled too). AUTO means enabled.
<b>C states</b>	Enabled[Default], Disabled	Enable/Disable CPU Power Management. Allows CPU to go to C states when it's not 100% utilized.

### 3.6.2.3 PCH-FW Configuration

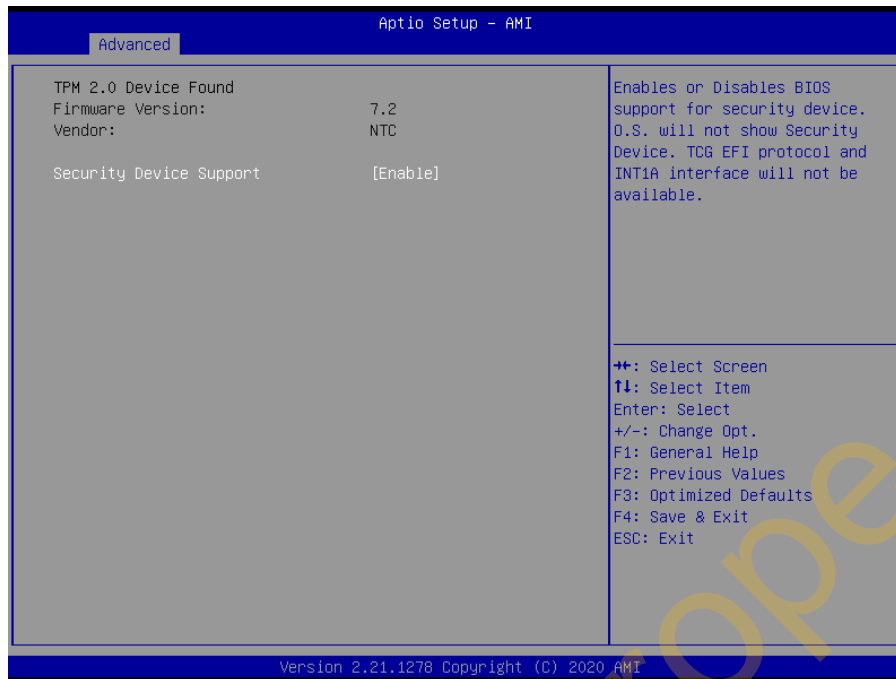

#### 3.6.2.3.1 Firmware Update Configuration

Item	Option	Description
<b>Me FW Image Re-Flash</b>	Enabled Disabled[Default],	Enable/Disable Me FW Image Re-Flash function.

### 3.6.2.4 Trusted Computing

Item	Options	Description
Security Device Support	Disable Enable[Default]	Enables or Disables BIOS support for security device. O.S. will not show Security Device. TCG EFI protocol and INT1A interface will not be available.

### 3.6.2.5 APCI Settings

Item	Options	Description
<b>Enable Hibernation</b>	Disabled Enabled[ <b>Default</b> ],	Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
<b>ACPI Sleep State</b>	Suspend Disabled, S3 (Suspend to RAM) [ <b>Default</b> ]	Select the highest ACPI sleep state the system will enter when the SUSPEND button is pressed.

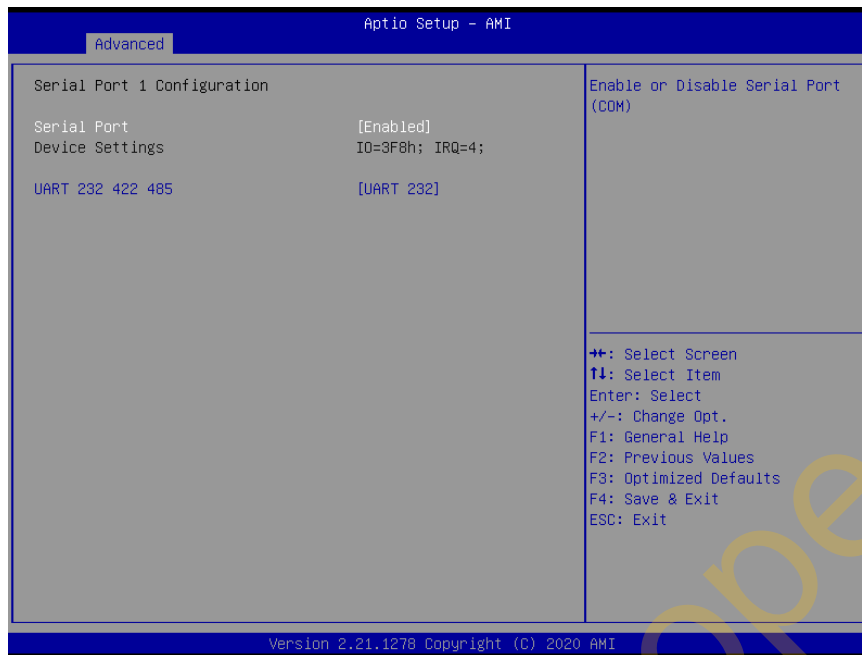

### 3.6.2.6 IT8528 Super IO Configuration

You can use this item to set up or change the IT8528 Super IO configuration for serial ports. Please refer to 3.6.2.6.1~ 3.6.2.6.6 for more information.

Item	Description
<b>Serial Port 1 Configuration</b>	Set Parameters of Serial Port 1 (COMA).
<b>Serial Port 2 Configuration</b>	Set Parameters of Serial Port 2 (COMB).
<b>Serial Port 3 Configuration</b>	Set Parameters of Serial Port 3 (COMC).
<b>Serial Port 4 Configuration</b>	Set Parameters of Serial Port 4 (COMD).
<b>Serial Port 5 Configuration</b>	Set Parameters of Serial Port 5 (COME).
<b>Serial Port 6 Configuration</b>	Set Parameters of Serial Port 5 (COMF).

### 3.6.2.6.1 Serial Port 1 Configuration

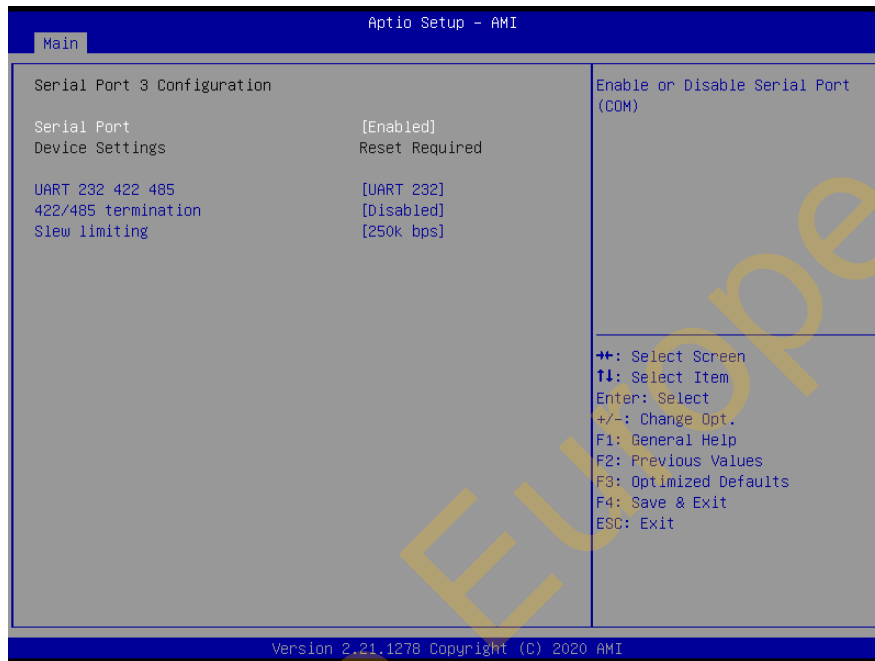

Item	Option	Description
<b>Serial Port</b>	Enabled[Default], Disabled	Enable or Disable Serial Port (COM).
<b>UART 232 422 485</b>	UART 232[Default] UART 422 UART 485	Change the Serial Port as RS232/422/485.

### 3.6.2.6.2 Serial Port 2 Configuration

Item	Option	Description
<b>Serial Port</b>	Enabled[ <b>Default</b> ], Disabled	Enable or Disable Serial Port (COM).
<b>UART 232 422 485</b>	UART 232[ <b>Default</b> ] UART 422 UART 485	Change the Serial Port as RS232/422/485.

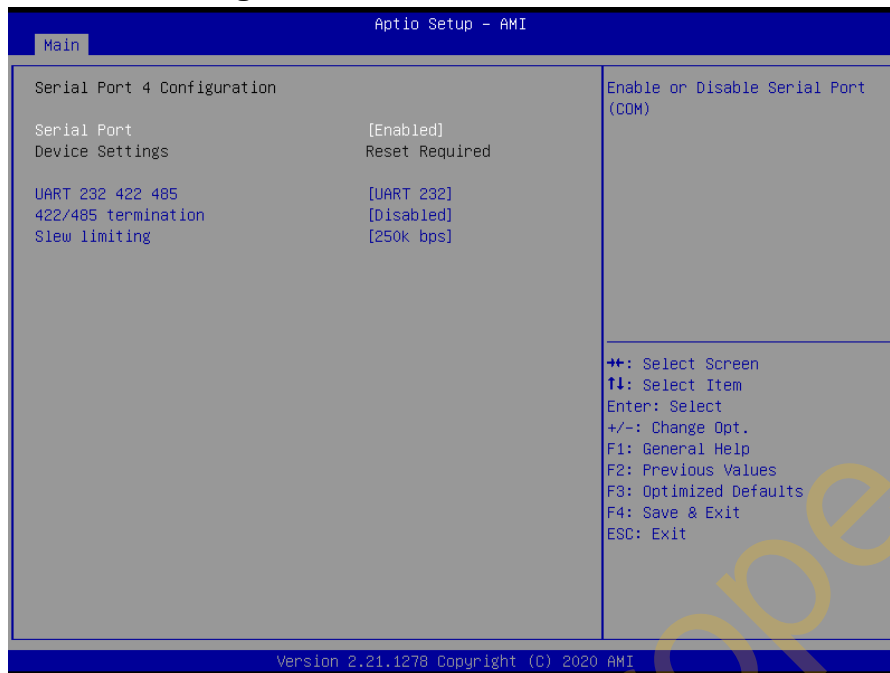

### 3.6.2.6.3 Serial Port 3 Configuration

Item	Option	Description
<b>Serial Port</b>	Enabled[ <b>Default</b> ], Disabled	Enable or Disable Serial Port (COM).
<b>UART 232 422 485</b>	UART 232(LOOPBACK) UART 232[ <b>Default</b> ] UART 422 UART 485	Change the Serial Port as RS232/422/485.
<b>422/485 termination</b>	Enabled, Disabled[ <b>Default</b> ]	TERM from GPIO.
<b>Slew limiting</b>	10M bps 250k bps[ <b>Default</b> ]	SLEW from GPIO.

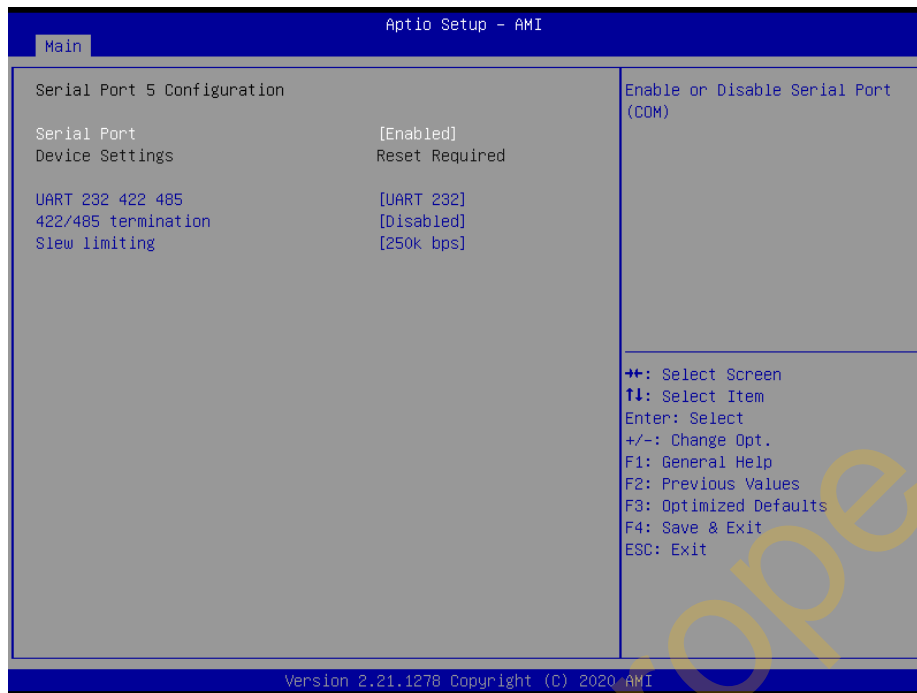

## 3.6.2.6.4 Serial Port 4 Configuration

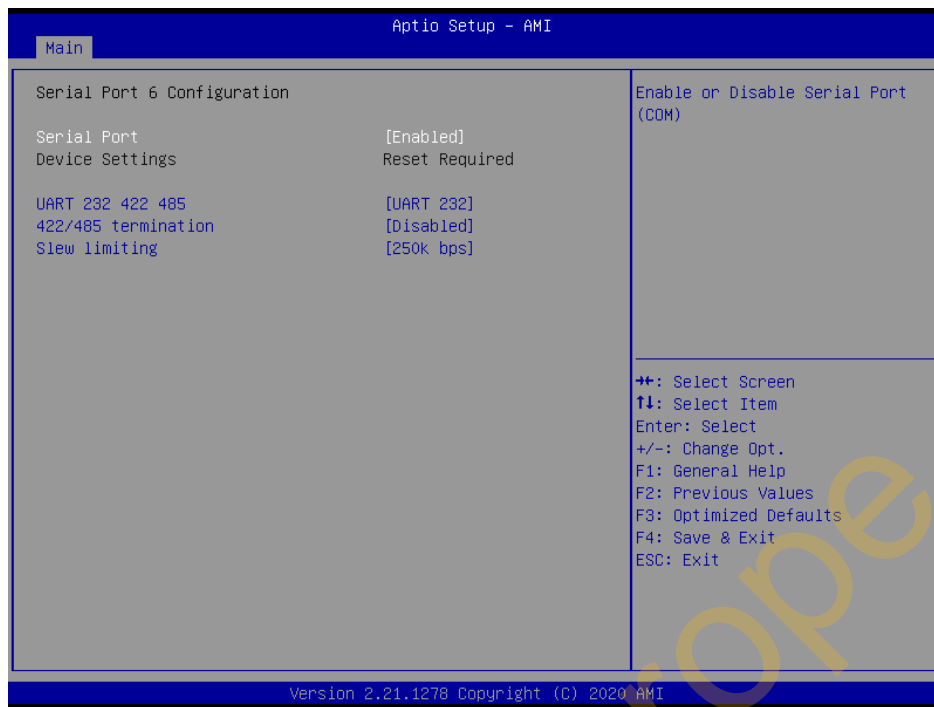

Item	Option	Description
Serial Port	Enabled[Default], Disabled	Enable or Disable Serial Port (COM).
UART 232 422 485	UART 232(LOOPBACK) UART 232[Default] UART 422 UART 485	Change the Serial Port as RS232/422/485.
422/485 termination	Enabled, Disabled[Default]	TERM from GPIO.
Slew limiting	10M bps 250k bps[Default]	SLEW from GPIO.

### 3.6.2.6.5 Serial Port 5 Configuration

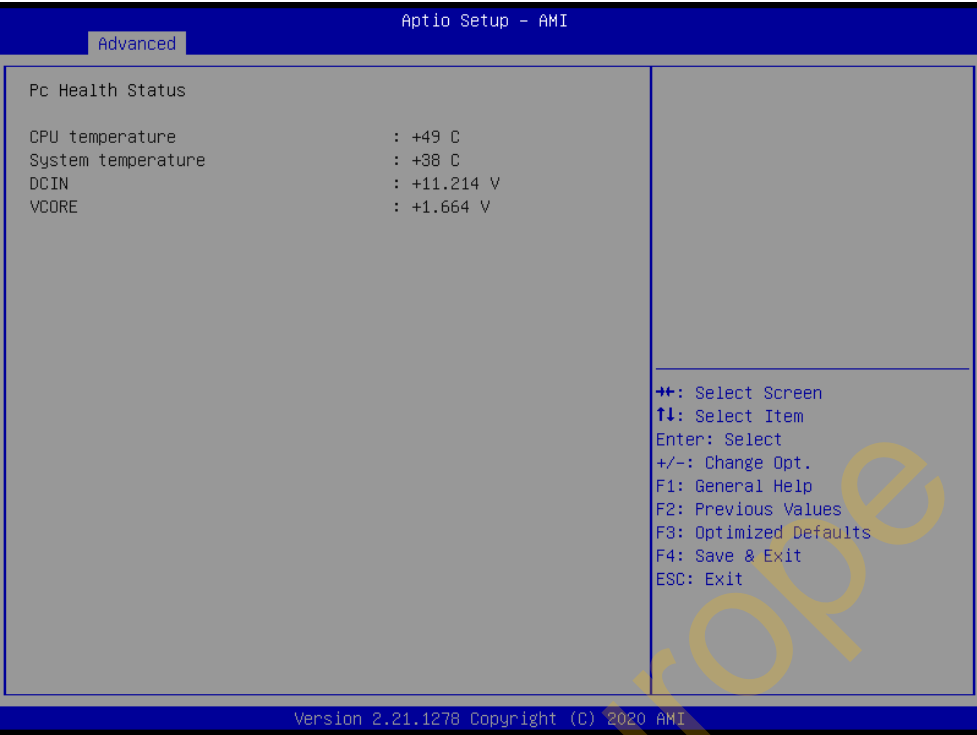

Item	Option	Description
Serial Port	Enabled[Default], Disabled	Enable or Disable Serial Port (COM).
UART 232 422 485	UART 232(LOOPBACK) UART 232[Default] UART 422 UART 485	Change the Serial Port as RS232/422/485.
422/485 termination	Enabled, Disabled[Default]	TERM from GPIO.
Slew limiting	10M bps 250k bps[Default]	SLEW from GPIO.

## 3.6.2.6.6 Serial Port 6 Configuration

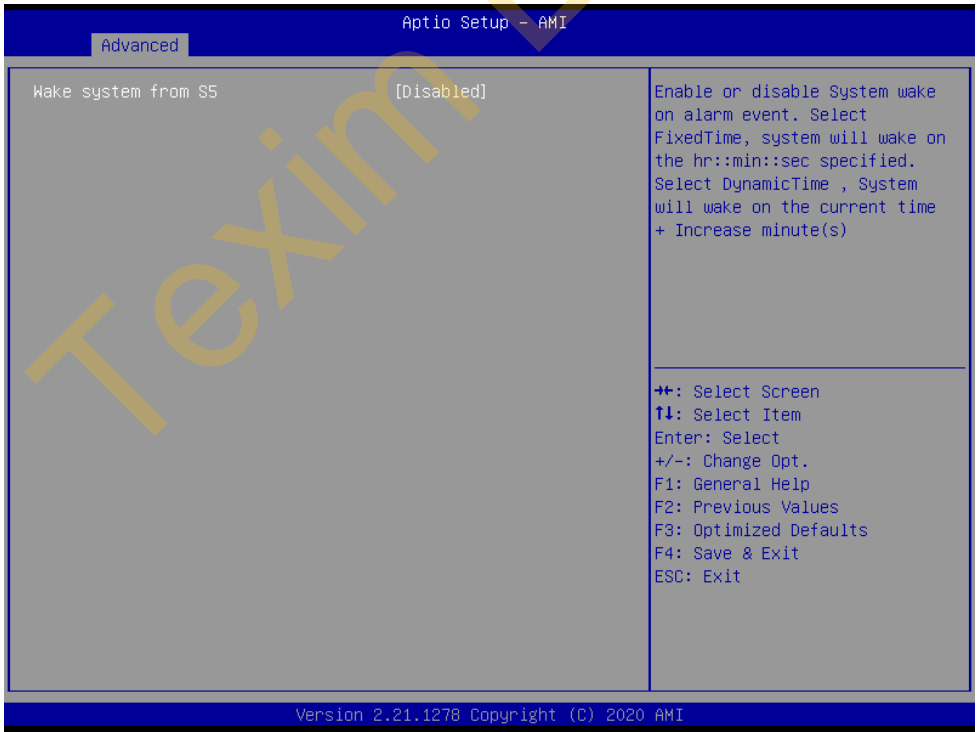

Item	Option	Description
Serial Port	Enabled[Default], Disabled	Enable or Disable Serial Port (COM).
UART 232 422 485	UART 232(LOOPBACK) UART 232[Default] UART 422 UART 485	Change the Serial Port as RS232/422/485.
422/485 termination	Enabled, Disabled[Default]	TERM from GPIO.
Slew limiting	10M bps 250k bps[Default]	SLEW from GPIO.

3.6.2.7 H/W Monitor

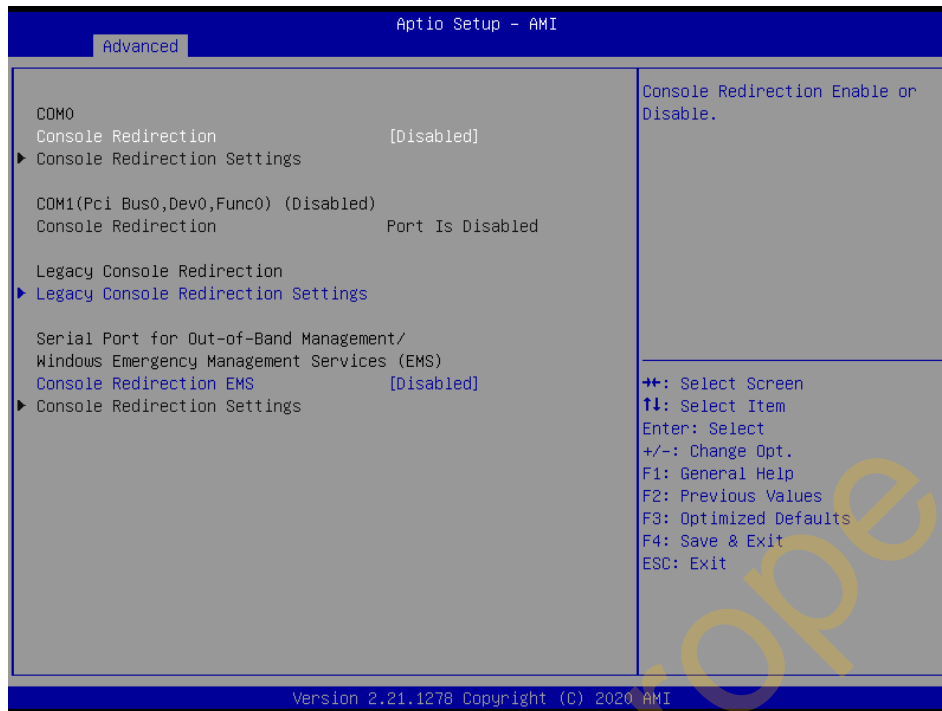

3.6.2.8 S5 RTC Wake Settings

Item	Options	Description
Wake system from S5	Disabled[Default], Fixed Time Dynamic Time	Enable or disable System wake on alarm event. Select Fixed Time, system will wake on the hr::min::sec specified. Select Dynamic Time, System will wake on the current time + Increase minute(s).

### 3.6.2.9 Serial Port Console Redirection

Item	Options	Description
Console Redirection	Disabled[Default], Enabled	Console Redirection Enable or Disable.
Console Redirection EMS	Disabled[Default], Enabled	Console Redirection Enable or Disable.

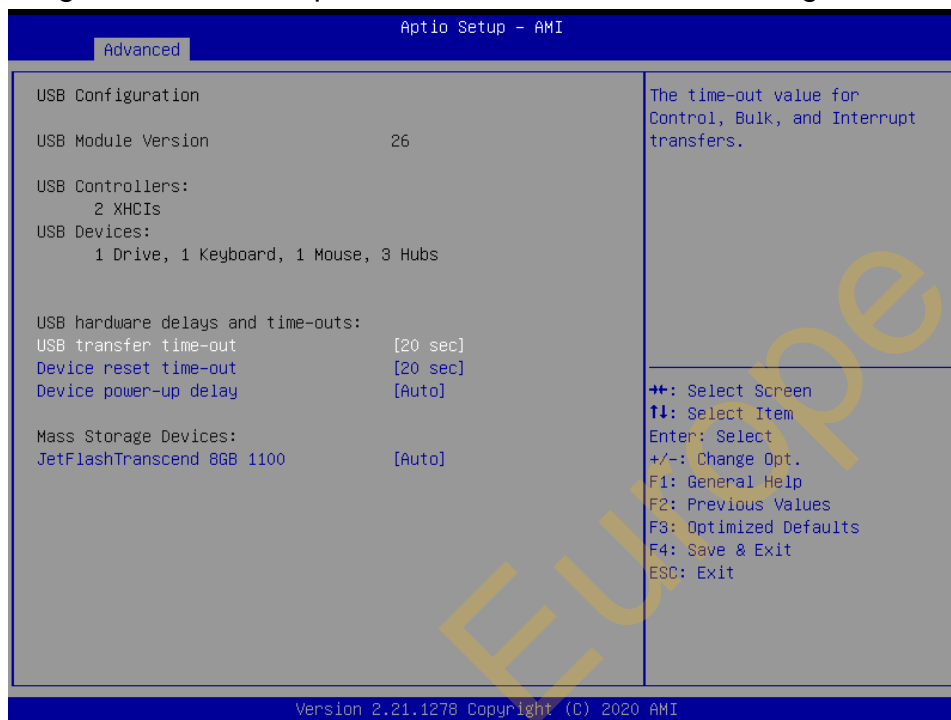

#### 3.6.2.9.1 Legacy Console Redirection Settings

Item	Option	Description
Redirection COM Port	COM0[Default],	Select a COM port to display redirection of Legacy OS and Legacy OPRM Messages.

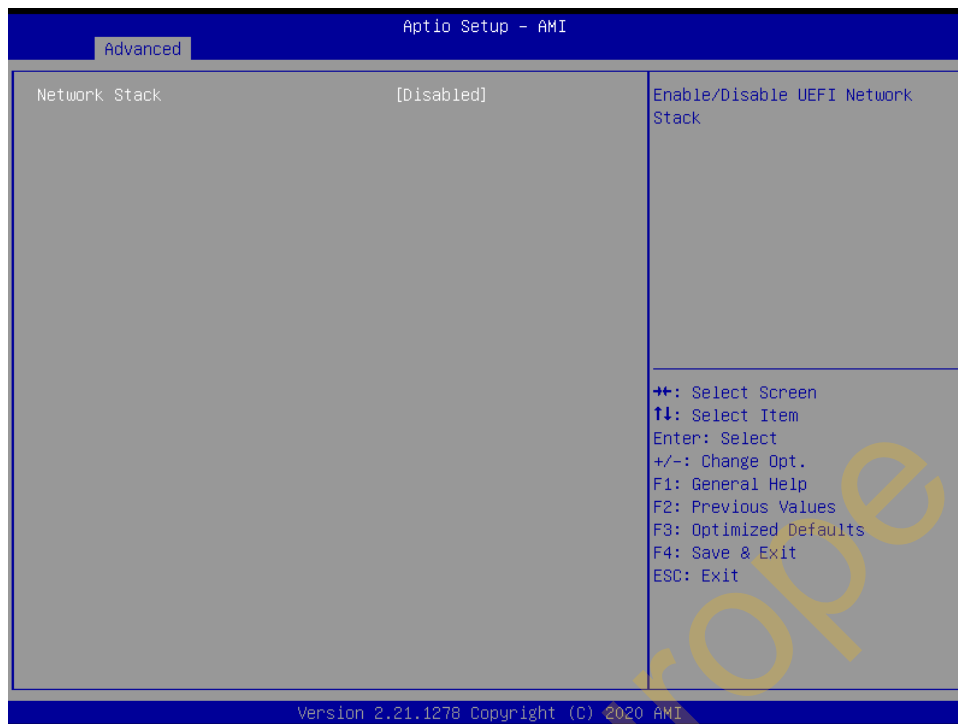

### 3.6.2.10 USB Configuration

The USB Configuration menu helps read USB information and configures USB settings.

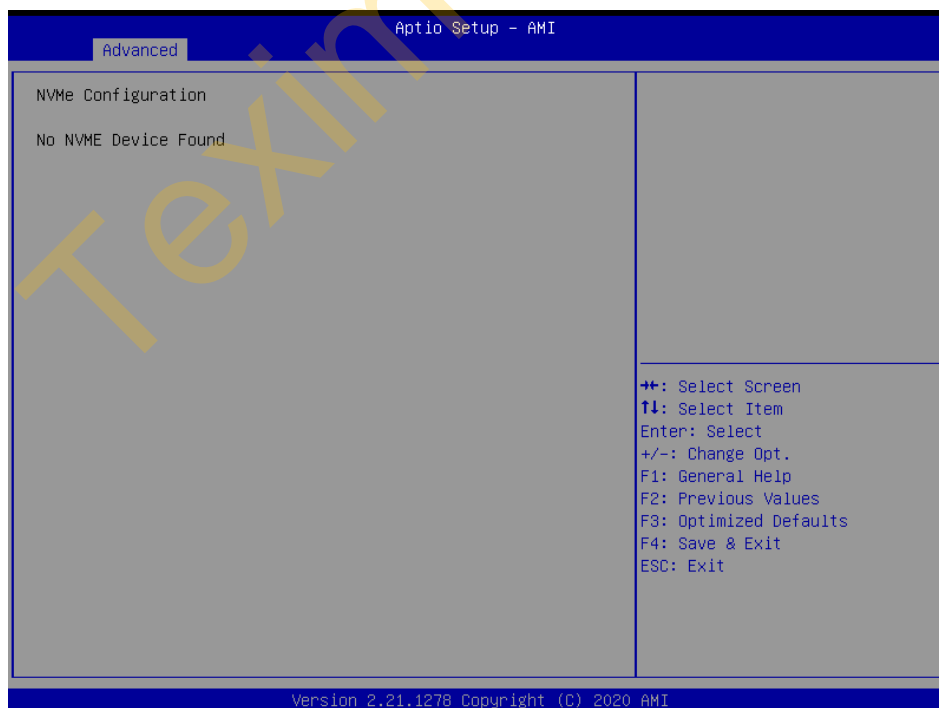

Item	Options	Description
USB transfer time-out	1 sec 5 sec 10 sec 20 sec[Default]	The time-out value for Control, Bulk, and Interrupt transfers.
Device reset time-out	10 sec 20 sec[Default] 30 sec 40 sec	USB mass storage device Start Unit command time-out.
Device power-up delay	Auto[Default] Manual	Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.
JetFlashTranscend 8GB 1100	Auto[Default] Floppy Forced FDD Hard Disk CD-ROM	Mass storage device emulation type. 'AUTO' enumerates devices according to their media format. Optical drives are emulated as 'CDROM', drives with no media will be emulated according to a drive type.

### 3.6.2.11 Network Stack Configuration

Item	Options	Description
Network Stack	Enabled Disabled[Default]	Enable/Disable UEFI Network Stack.

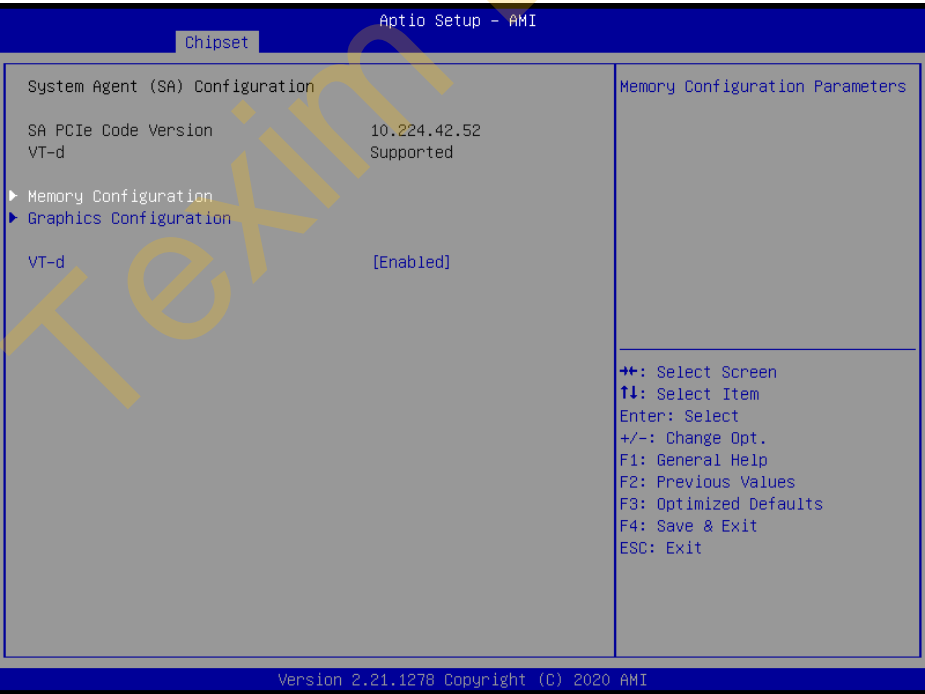

### 3.6.2.12 NVMe Configuration

3.6.3 Chipset

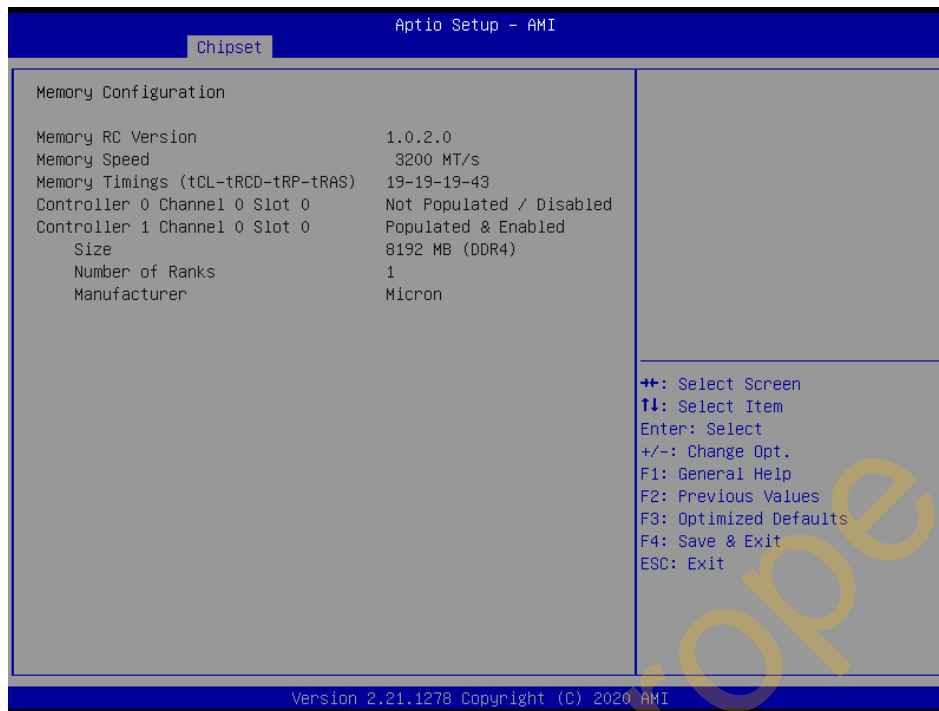

3.6.3.1 System Agent (SA) Configuration

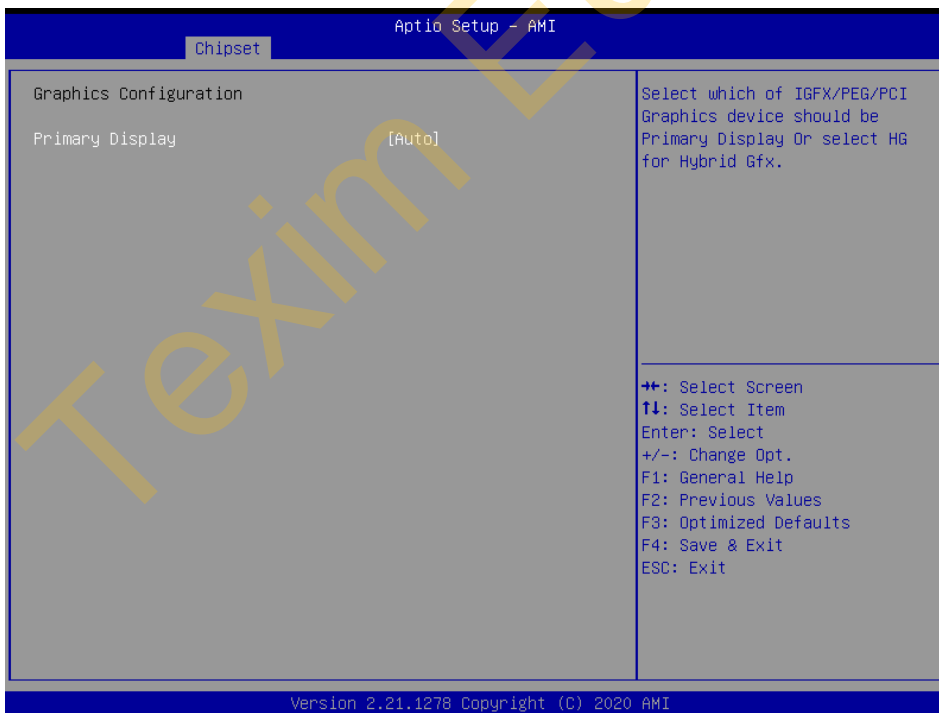

Item	Option	Description
VT-d	Enabled[Default] Disabled	VT-d capability.

### 3.6.3.1.1 Memory Configuration

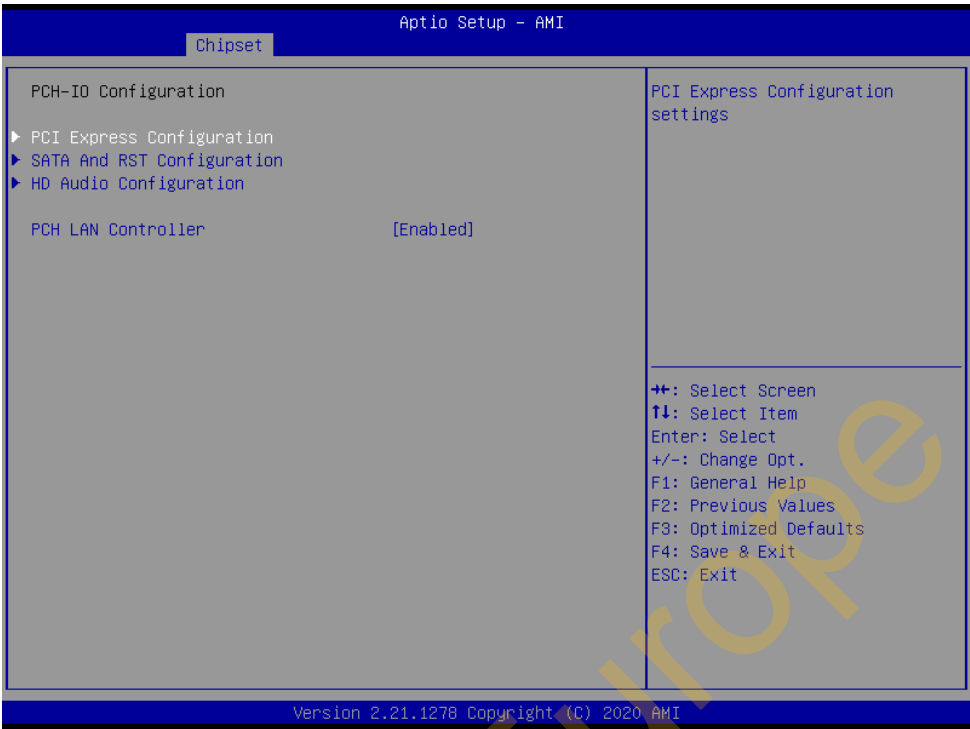

### 3.6.3.1.2 Graphics Configuration

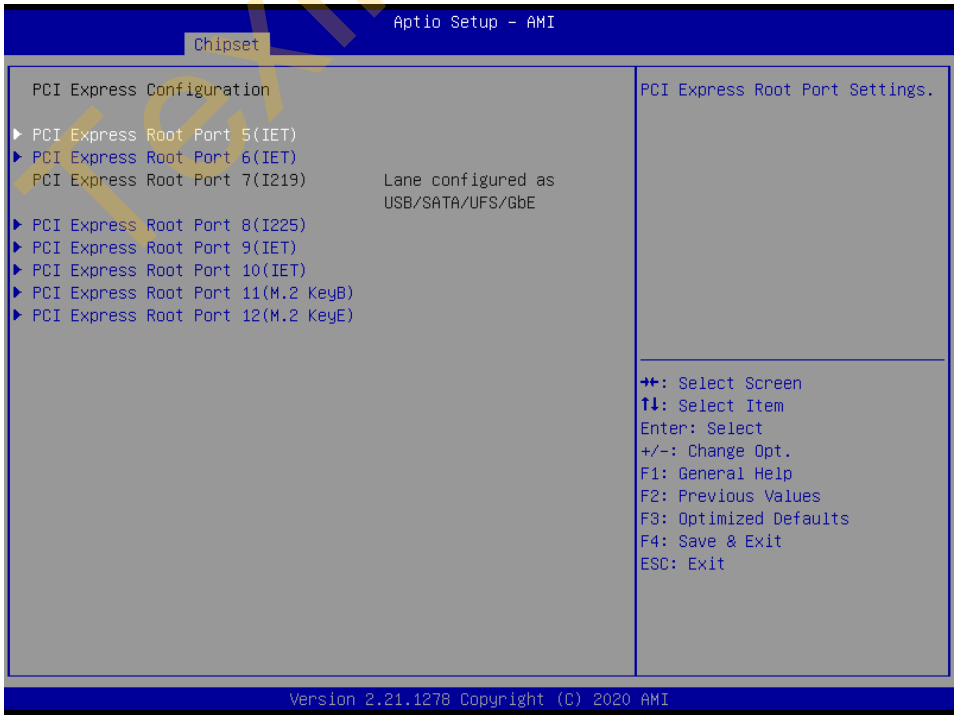

Item	Option	Description
Primary Display	Auto[Default] IGFX	Select which of IGFX/PEG/PCI Graphics device should be Primary Display Or select HG for Hybrid Gfx.

3.6.3.2 PCH-IO Configuration

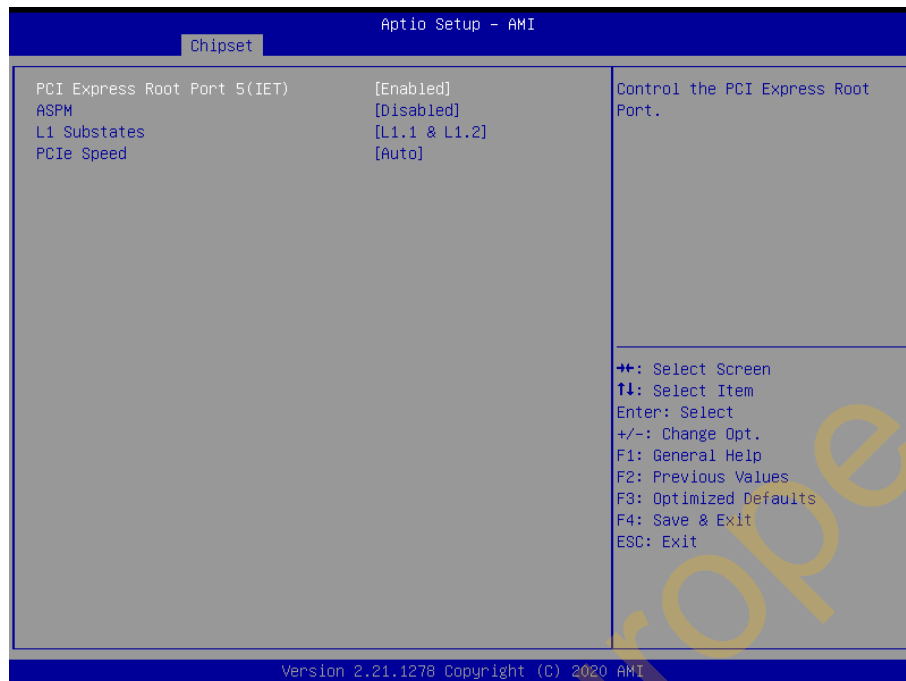

Item	Option	Description
PCH LAN Controller	Disabled	Enable or disable onboard NIC.
	Enabled[Default]	

3.6.3.2.1 PCI Express Configuration

### 3.6.3.2.1.1 PCI Express Root Port 5 (IET)

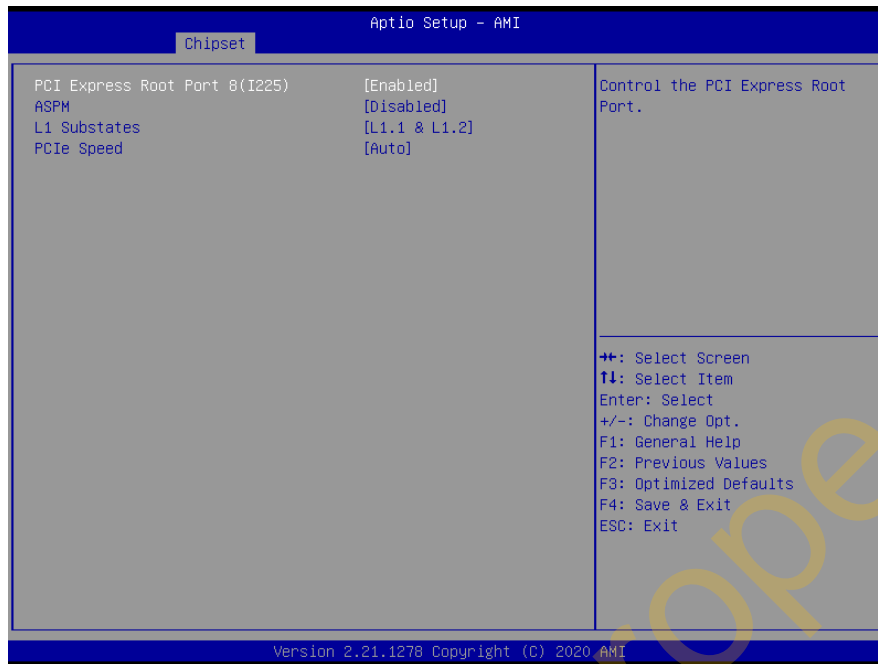

Item	Option	Description
<b>PCI Express Root Port 5(IET)</b>	Enabled[Default], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[Default] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[Default],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[Default] Gen1 Gen2 Gen3	Configure PCIe speed.

3.6.3.2.1.2 PCI Express Root Port 6 (IET)

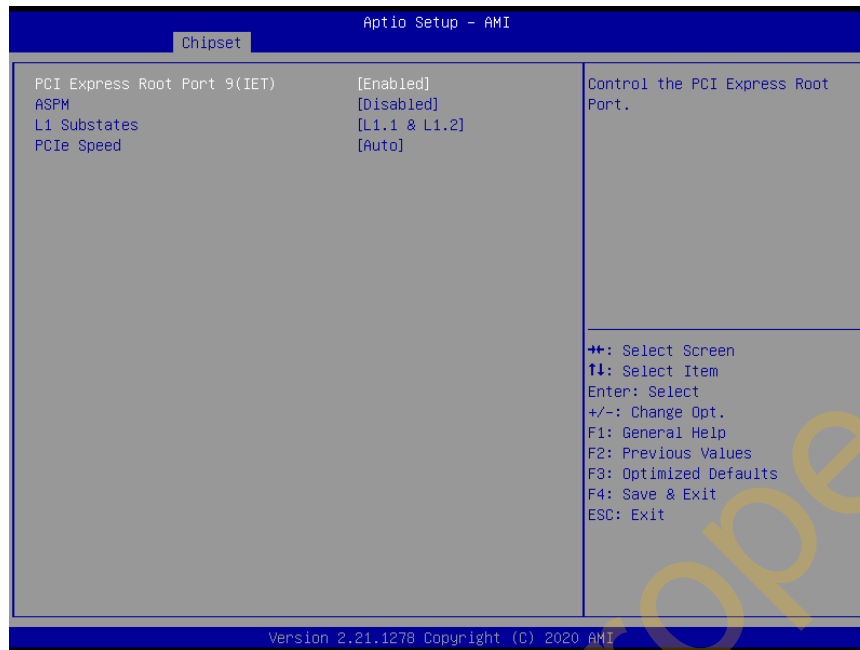

Item	Option	Description
PCI Express Root Port 6(IET)	Enabled[Default], Disabled	Control the PCI Express Root Port.
ASPM	Disabled[Default] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
L1 Substates	Disabled L1.1 L1.1 & L1.2[Default],	PCI Express L1 Substates settings.
PCIe Speed	Auto[Default] Gen1 Gen2 Gen3	Configure PCIe speed.

### 3.6.3.2.1.3 PCI Express Root Port 8 (I225)

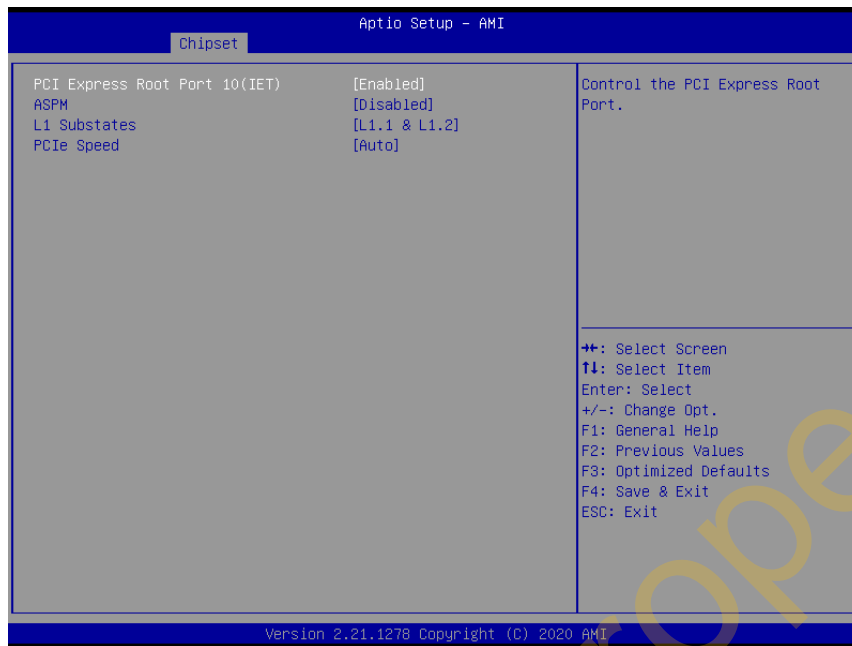

Item	Option	Description
<b>PCI Express Root Port 8(I225)</b>	Enabled[ <b>Default</b> ], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[ <b>Default</b> ] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[ <b>Default</b> ],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[ <b>Default</b> ] Gen1 Gen2 Gen3	Configure PCIe speed.

### 3.6.3.2.1.4 PCI Express Root Port 9 (IET)

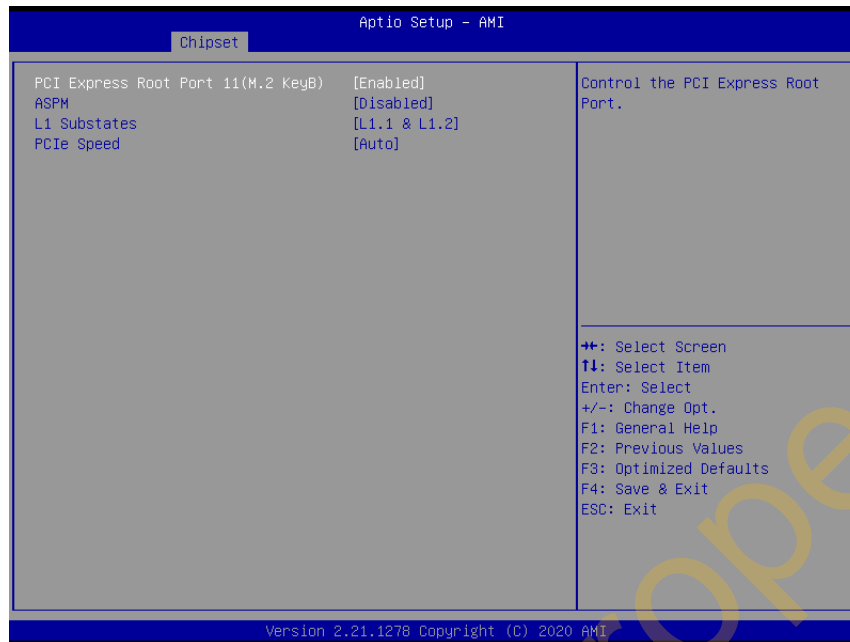

Item	Option	Description
<b>PCI Express Root Port 9(IET)</b>	Enabled[Default], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[Default] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[Default],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[Default] Gen1 Gen2 Gen3	Configure PCIe speed.

### 3.6.3.2.1.5 PCI Express Root Port 10 (IET)

Item	Option	Description
<b>PCI Express Root Port 10(IET)</b>	Enabled[ <b>Default</b> ], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[ <b>Default</b> ] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[ <b>Default</b> ],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[ <b>Default</b> ] Gen1 Gen2 Gen3	Configure PCIe speed.

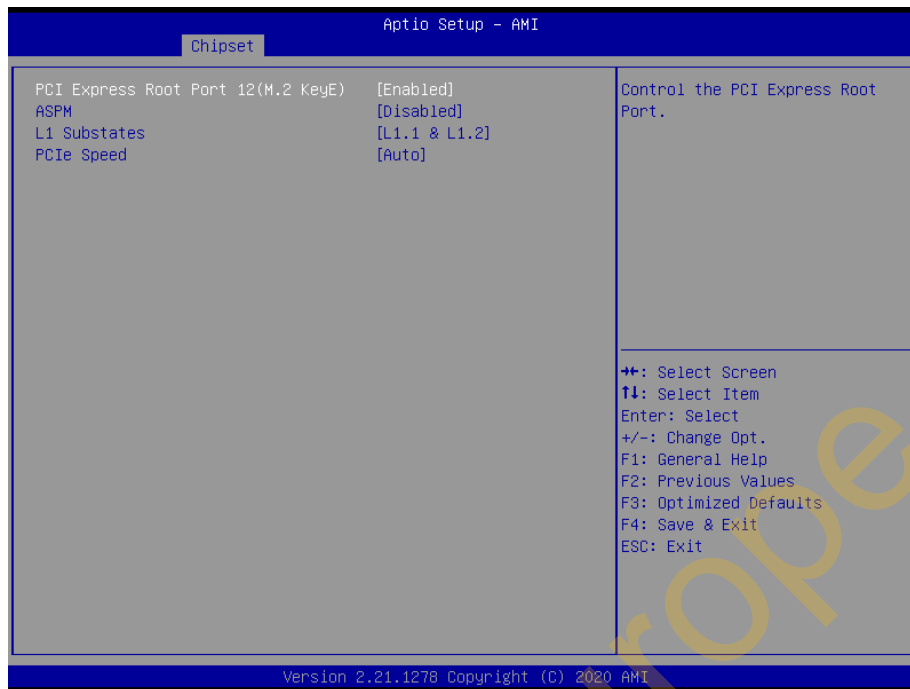

### 3.6.3.2.1.6 PCI Express Root Port 11 (M.2 KeyB)

Item	Option	Description
<b>PCI Express Root Port 11 (M.2 KeyB)</b>	Enabled[Default], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[Default] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[Default],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[Default] Gen1 Gen2 Gen3	Configure PCIe speed.

### 3.6.3.2.1.7 PCI Express Root Port 12 (M.2 KeyE)

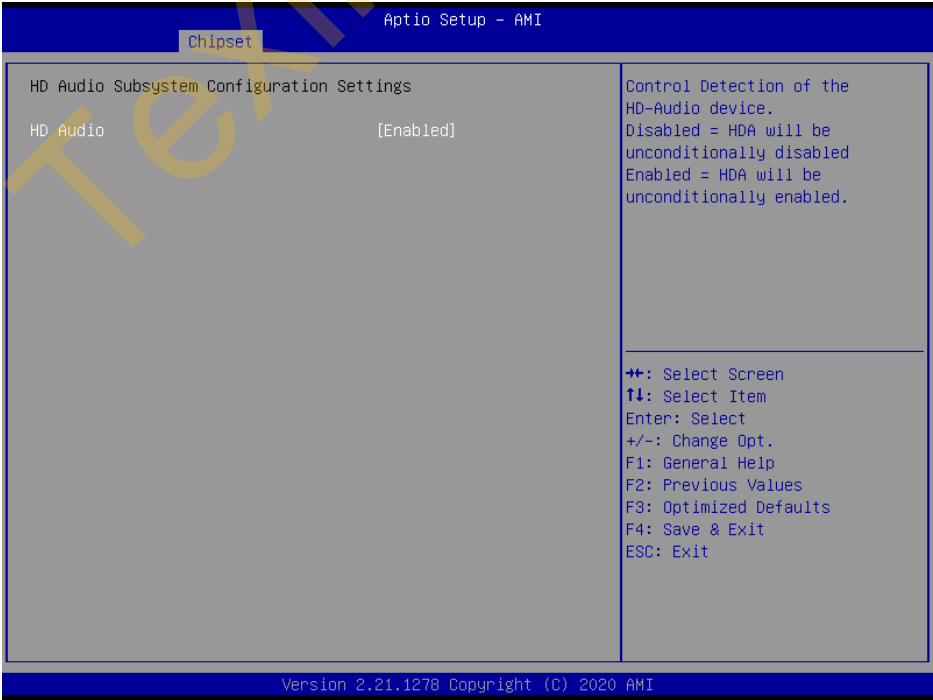

Item	Option	Description
<b>PCI Express Root Port 12 (M.2 KeyE)</b>	Enabled[Default], Disabled	Control the PCI Express Root Port.
<b>ASPM</b>	Disabled[Default] L0s L1 L0sL1 Auto	Set the ASPM Level: Force L0s – Force all links to L0s State AUTO – BIOS auto configure DISABLE – Disables ASPM.
<b>L1 Substates</b>	Disabled L1.1 L1.1 & L1.2[Default],	PCI Express L1 Substates settings.
<b>PCIe Speed</b>	Auto[Default] Gen1 Gen2 Gen3	Configure PCIe speed.

3.6.3.2.2 SATA And RST Configuration

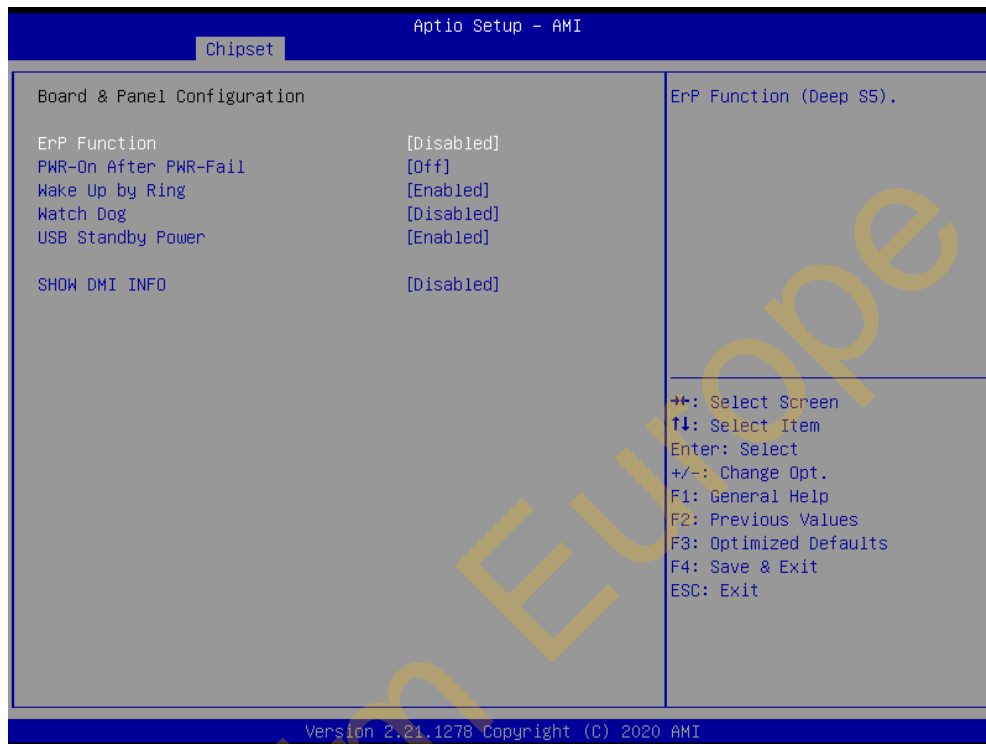

Item	Option	Description
SATA Controller(s)	Enabled[Default] Disabled,	Enable/Disable SATA Device.
Port 0	Enabled[Default] Disabled,	Enable or Disable SATA Port.

3.6.3.2.3 HD Audio Configuration

Item	Option	Description
HD Audio	Disabled Enabled[Default],	Control Detection of the HD-Audio device. Disable = HDA will be unconditionally disabled Enabled = HDA will be unconditionally enabled.

### 3.6.3.2 Board & Panel Configuration

Item	Option	Description
ErP Function	Disabled[Default] Enabled	ErP Function (Deep S5).
PWR-On After PWR-Fail	Off[Default] On Last state	AC loss resume.
Wake Up by Ring	Disabled Enabled[Default]	Wake Up by Ring from S3/S4/S5.
Watch Dog	Disabled[Default] 30 sec 40 sec 50 sec 1 min 2 min 10 min 30 min	Select WatchDog.
USB Standby Power	Disabled Enabled[Default]	Enable/Disabled USB Standby Power during S3/S4/S5.
SHOW DMI INFO	Disabled[Default] Enabled	SHOW DMI INFO.

### 3.6.4 Security

- **Administrator Password**

Set setup Administrator Password

- **User Password**

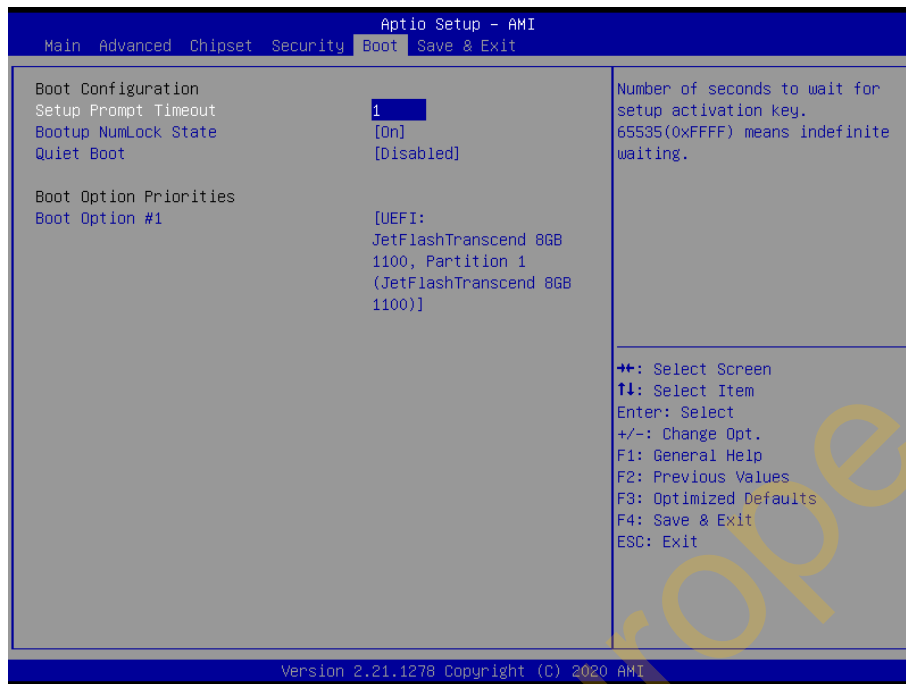

Set User Password

### 3.6.4.1 Secure Boot menu

Item	Option	Description
<b>Secure Boot</b>	Disabled Enabled[Default]	Secure Boot can be enabled if 1.System running in User mode with enrolled Platform Key(PK) 2.CSM function is disabled.
<b>Secure Boot Mode</b>	Standard[Default] Custom	Customizable Secure Boot mode: In Custom mode Secure Boot Policy variables can be configured by a physically present user without full authentication.

### 3.6.5 Boot

Item	Option	Description
<b>Setup Prompt Timeout</b>	1~ 65535	Number of seconds to wait for setup activation key. 65535(0xFFFF) means indefinite waiting.
<b>Bootup NumLock State</b>	On[Default] Off	Select the Keyboard NumLock state
<b>Quiet Boot</b>	Disabled[Default] Enabled	Enables or disables Quiet Boot option
<b>Boot Option #1</b>	Set the system boot order.	

3.6.6 Save and exit

3.6.6.1 Save Changes and Reset

Reset the system after saving the changes.

3.6.6.2 Discard Changes and Reset

Any changes made to BIOS settings during this session of the BIOS setup program are discarded. The setup program then exits and reboots the controller.

### **3.6.6.3 *Restore Defaults***

This option restores all BIOS settings to the factory default. This option is useful if the controller exhibits unpredictable behavior due to an incorrect or inappropriate BIOS setting.

### **3.6.6.4 *Launch EFI Shell from filesystem device***

Attempts to Launch EFI Shell application (Shellx64.efi) from one of the available filesystem devices.

Texim Europe

## 4. Drivers Installation

---

Texim Europe

**Note:** Installation procedures and screen shots in this section are for your reference and may not be exactly the same as shown on your screen.

## 4.1 Install Chipset Driver

All drivers can be found on the Avalue Official Website:

<http://www.avalue.com.tw>.

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

**Step 3. Click Install.**

**Step1. Click Next.**

**Step 4. Click Finish to complete setup.**

**Step 2. Click Accept.**

## 4.2 Install ME Driver

All drivers can be found on the Avalue Official Website:

<http://www.avalue.com.tw>.

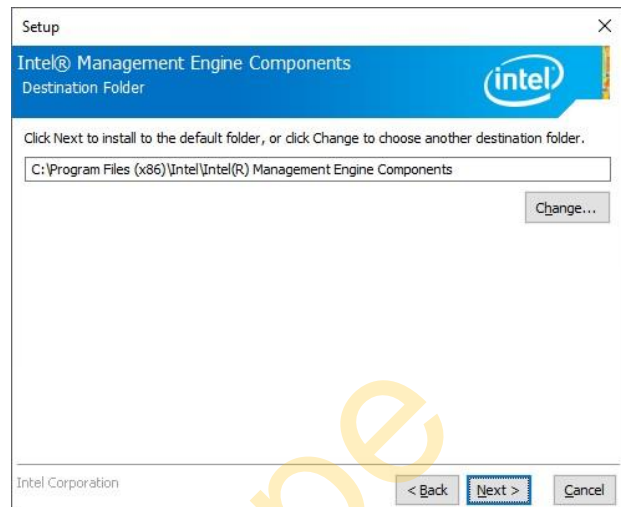

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system. If the warning message appears while the installation process, click Continue to go on.

**Step1.** Click **Next** to start installation.

**Step 2.** Click **Next**.

**Step 3.** Click **Next** to proceed setup.

**Step 4.** Click **Finish** to complete setup.

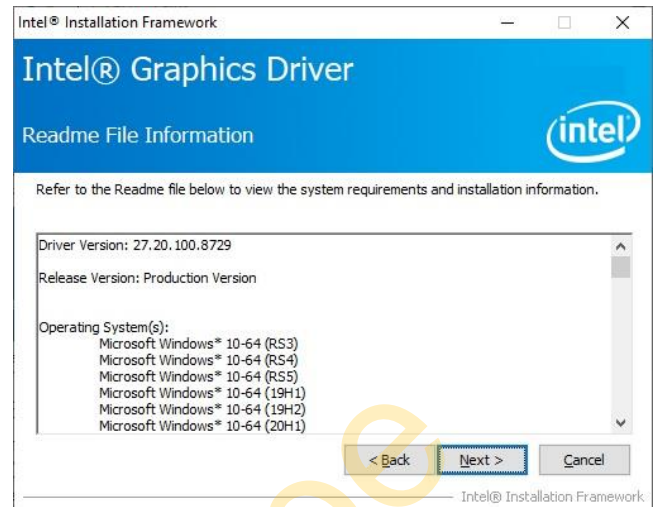

## 4.3 Install VGA Driver

All drivers can be found on the Avalue Official Website:

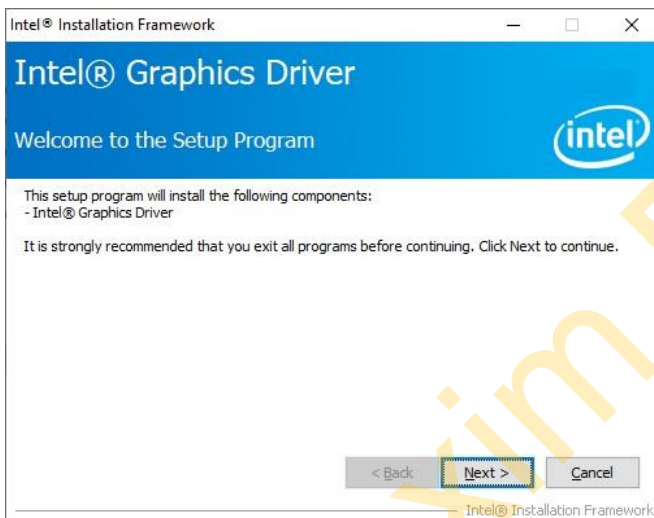

<http://www.avalue.com.tw>.

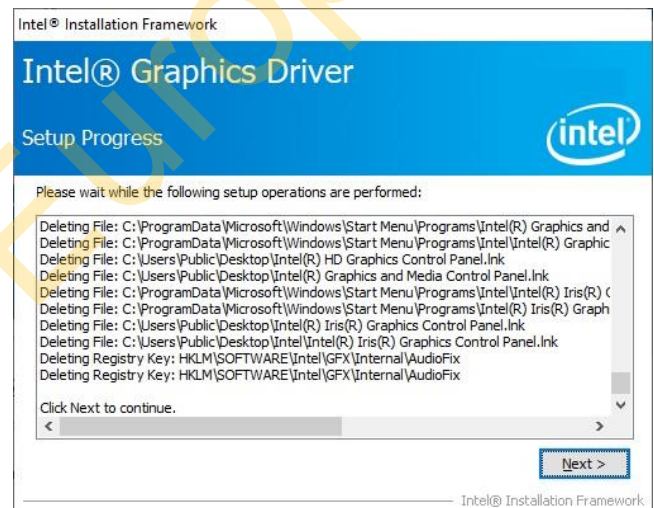

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system.

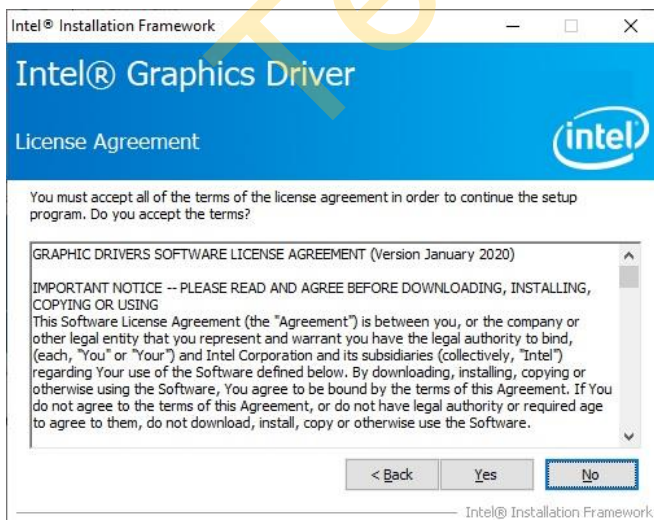

**Step 3. Click Next.**

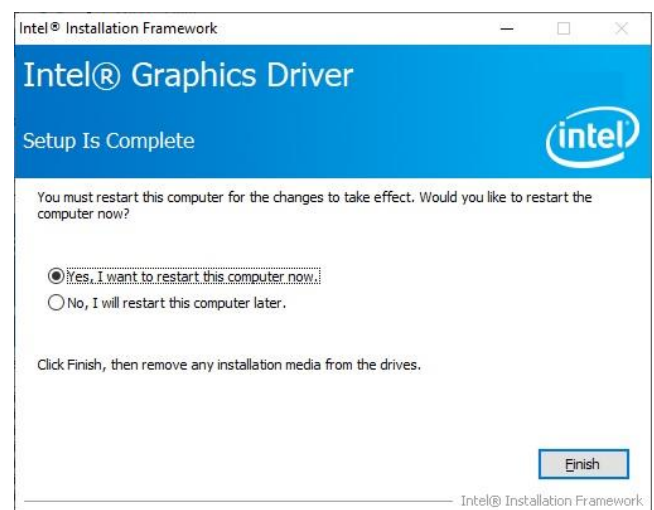

**Step 1. Click Next** to continue installation.

**Step 4. Click Next.**

**Step 2. Click Yes.**

**Step 5. Click Finish** to complete setup.

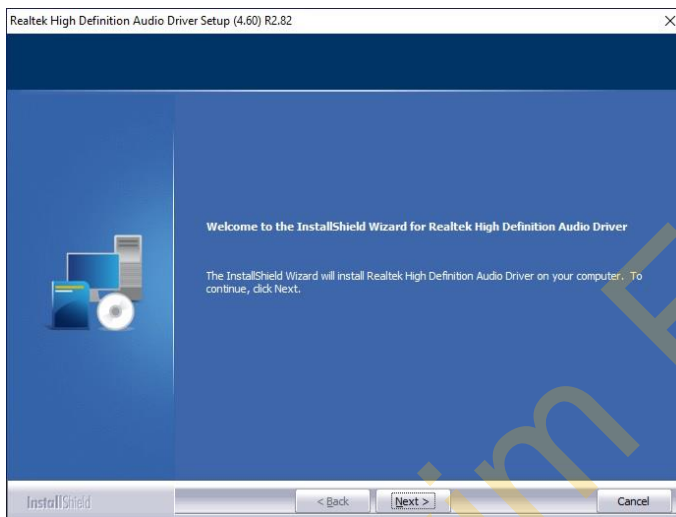

## 4.4 Install Audio Driver (For Realtek ALC892)

All drivers can be found on the Avalue Official Website:

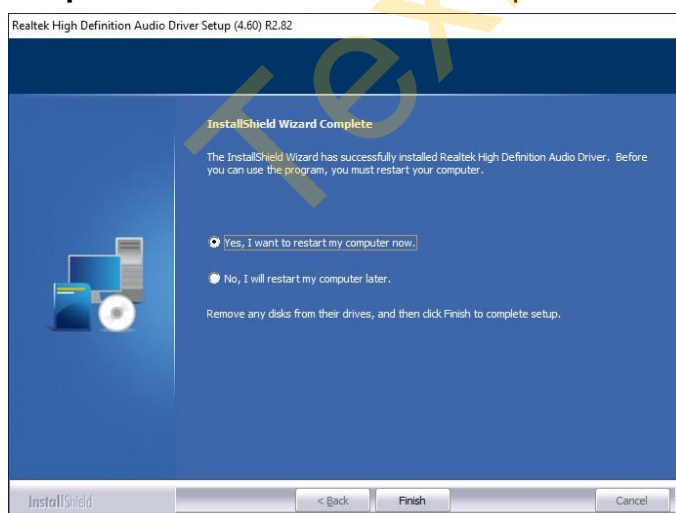

<http://www.avalue.com.tw>.

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system.

**Step 1.** Click **Next** to continue setup.

**Step 2.** Click **Finish** to complete the setup.

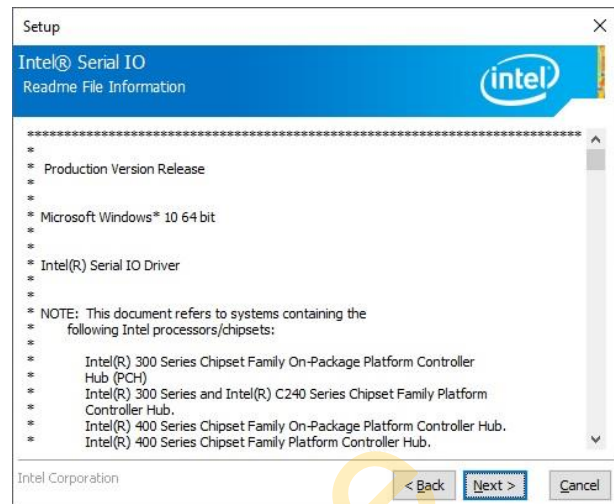

## 4.5 Install SerialIO Driver

All drivers can be found on the Avalue Official Website:

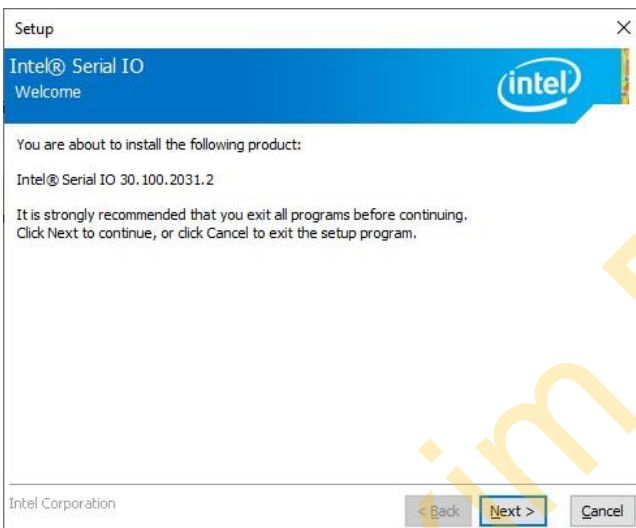

<http://www.avalue.com.tw>.

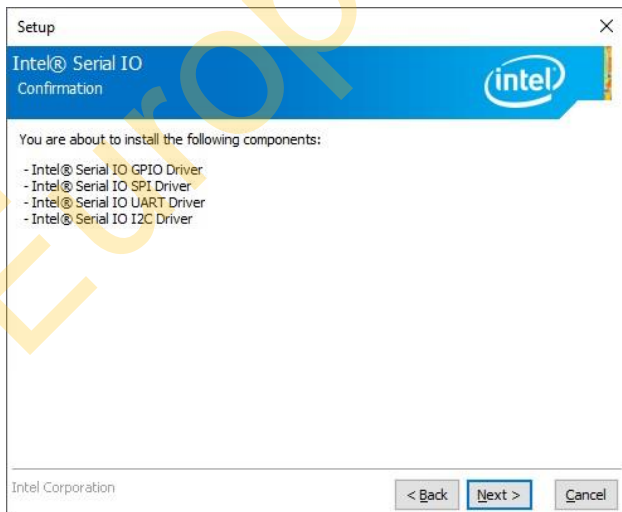

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system.

**Step 3. Click Next.**

**Step 1. Click Next to continue installation.**

**Step 4. Click Next.**

**Step 2. Click Next.**

**Step 5. Click Finish to complete setup.**

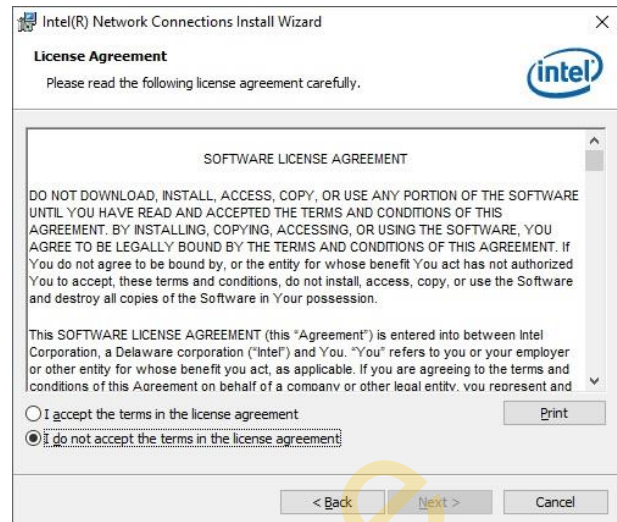

## 4.6 Install Ethernet Driver

All drivers can be found on the Avalue Official Website:

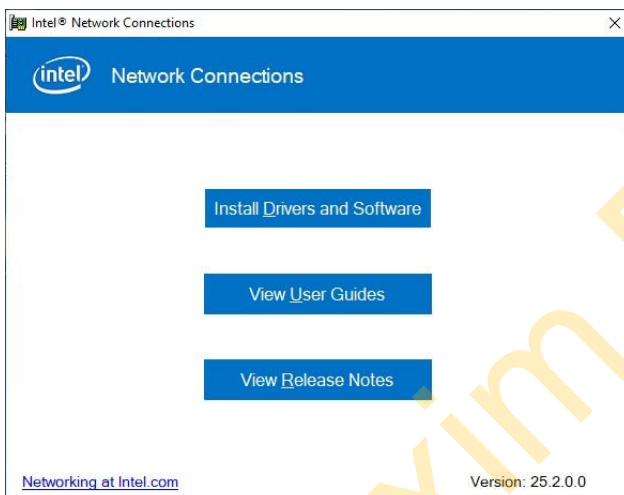

<http://www.avalu.com.tw>.

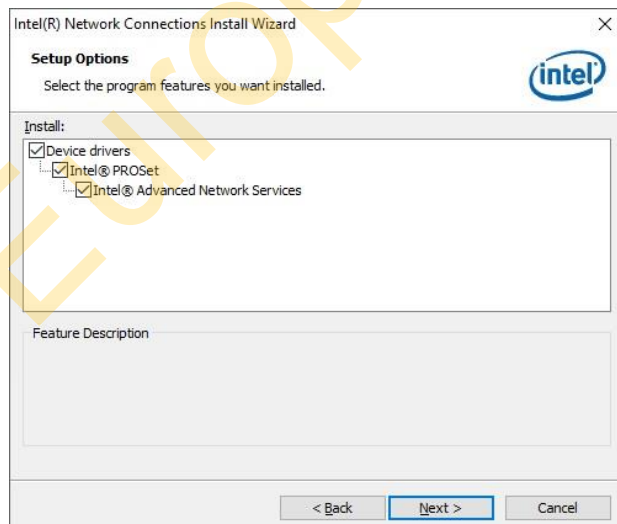

**Note:** The installation procedures and screen shots in this section are based on Windows 10 operation system.

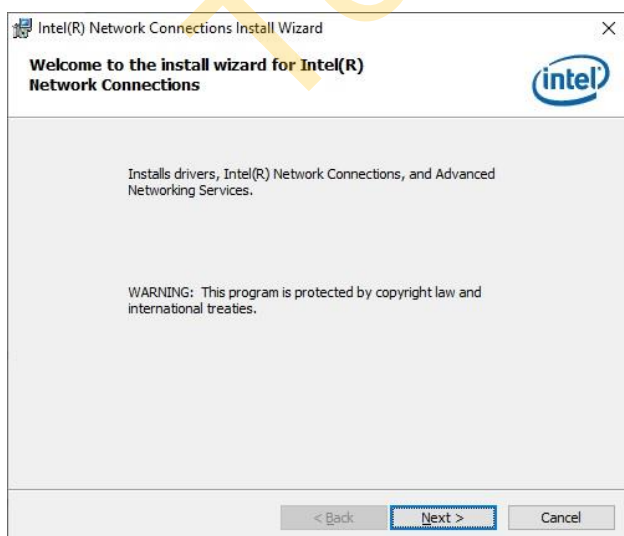

**Step 3. Click Next.**

**Step 1. Click Install Drivers and Software.**

**Step 4. Click Next.**

**Step 2. Click Next.**

**Step 5. Click Install.**

**Step 6.** Click **Finish** to complete the setup.
