Details about delivery times and availability are noncommittal and have no legal force.

You may already be aware that the global market situation for certain raw materials and primary products is extremely tight at present. Numerous manufacturers with increasing demands are only being supplied with delivery quantities below market requirements.

RAFI has also been severely affected in the meantime for various products. Particularly due to the shortage of plastic granulates, our material demands cannot be completely met by our suppliers.

We would like to inform you that the ability to deliver our products has a very high priority for us. Due to this, we are forced to switch to an alternative plastic material for some individual parts of our products in order to counteract an impending inability to deliver.

We are willing to accept the high internal effort of material conversion and testing and continue to deliver a consistently high quality. In addition, all designated approvals remain valid, as we use approved alternative materials. However, it is unfortunately unavoidable that slight color differences may occur in individual cases.

This is exemplified by the following image comparison, in which the yellow material has been converted:

We hope for your understanding for this extraordinary situation and your confidence in our products and are looking forward to our further cooperation.
