## Li/SOCl<sub>2</sub> Battery: ER34615M

### Technical data

- Nominal capacity : 13Ah
- Nominal voltage : 3.6V
- Max. continuous current : 1800mA
- Max. pulse current : 3500mA

3500mA/0.1s pulses, drained every 2 minutes at 23°C from 15mA mid-discharged cells with 20μA base current, yield voltage readings above 2.7V. The readings may vary according to the pulse characteristics, the temperature, and the cell's previous history.

- Standard discharge current : 15mA
- Working temperature range : -55°C ~ +80°C
- Weight : 109g

UL. Component Recognition( MH46165 )

### Applications

- Smart meter
- Security devices
- IoT devices

International size reference : D

### Features & Benefits

- Superior long-term reliability
- Low self-discharge rate
- High safety and energy density

Typical discharge curves at 23°C

Voltage vs. Temperature

Capacity vs. Current (2V cut-off)

Voltage response @400mA or 8.2ohms 23±2 °C

#### WARNING:

Fire, explosion and severe burn hazard. Do not recharge, crush, disassemble, heat above 85°C (185°F), incinerate or expose contents to water.  
Do not solder directly to the cell, use tabbed cell instead.

#### ATTENTION:

Consult FANSO when using batteries at temperature exceeding the -10 °C ~ +40 °C range. "The above data comes from FANSO's laboratory, any representations in this document concerning performance are for informational purpose only. FANSO Technology Co., Ltd reserves the right to interpret this data."

## **Disclaimer**

ALL PRODUCTS, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Texim Europe B.V. its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Texim"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Texim makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product.

It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application.

Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time.

All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts.

Please contact us if you have any questions about the contents of the datasheet.

This may not be the latest version of the datasheet. Please check with us if a later version is available.
