## **Custom Lens Solutions**

Our C-mount cameras can be paired with a variety of off-the-shelf lenses. Customers are welcome to choose their own, or alternatively our engineers are on standby to assist with selecting the right camera lens for different applications.

## **FPD-Link III Frame Grabber**

The ease of usage, benefits and integration of a FPD-Link III camera in embedded systems is often made complex by the lack of FPD-Link ports and connectors on the system. For those scenarios TechNexion developed a framegrabber that easily plug into a USB port and extend the system with FPD-Link interconnect.

## Up to 15m

Up to 15 meters of data and power transmission over a single COAX cable.

**UVC Compliant** Fully plug-n-play in Windows and Linux embedded systems.

## Autodetect

Zero configuration required to detect any specific TechNexion FPD-Link camera by the framegrabber.

Software Linux and Yocto systems are supported.

#### VizionViewer™

Easy to use software utility providing you with granular camera settings control.

#### VizionSDK

Hardcode and control your cameras with C# and Python code.
